

DEUTZ engines

are the product of years of research and development. The profound know-how gained in connection with high quality requirements is the guarantee for manufacturing of engines with a long life, high reliability and low fuel consumption. Naturally the high requirements for protection of the environment are also met.

Maintenance and care

are decisive for whether the engine satisfactorily meets the demands put on it. Compliance with the prescribed maintenance times and the careful execution of maintenance and care work are therefore essential. Difficult operating conditions deviating from normal operation must be observed especially.

Service

Please consult one of our service representatives responsible for operating faults and spare parts questions. Our trained specialist personnel ensures fast, professional repairs using original parts in the event of damage. The Technical Circulars listed in this operating manual are obtainable from your DEUTZ partner. Please turn to the end of this manual for further service information.

Take care when the engine is running

Only carry out maintenance work or repairs with the engine switched off. Ensure that the engine cannot be started unintentionally - danger of accidents!
Re-install any removed protective equipment upon completion of the work.
Observe industrial safety regulations when operating the engine in enclosed spaces or underground.
When working on the running engine, work clothing must be close fitting.
Only re-fuel with the engine switched off.

Danger

This symbol is used for all safety instructions which, if not observed, present a direct danger to life and limb for the person involved. Observe these carefully. Also pass on the safety instructions to your operating personnel. Furthermore, the legislation for „general regulations for safety and the prevention of accidents“ must be observed.

Warning

Danger for component/engine. Failure to comply can lead to destruction of the component/engine. Must be observed.
