VOLVO PENTA INBOARD DIESEL D25A MS

6-cylinder, 4-stroke, direct-injected, turbocharged marine diesel engine with aftercooler – crankshaft power* 485 kW (660 hp)

* Power rating – see Technical Data

Powerful and reliable engine for demanding operation in commercial applications

The Volvo Penta D25A MS engine is constructed to meet the most demanding requirements, such as marine main propulsion or marine generator drive. Its compactness and durability applies the most advanced technologies and engineering know-how; all this to benefit the operator.

The Volvo Penta D25A MS diesel engine is built to the highest quality standards recognized by all the major marine classification societies, such as Germanischer Lloyds, Norske Veritas etc. as well as the national Shipping Inspections.

Volvo Penta is continuously making intensive research work on the marine application of the engine to produce an engine with a compact design, which gives many advantages, such as low running costs in relation to high output.

An optimal combination of combustion chambers, fuel injection system, and effective turbocharger and charge air cooling system, provide an excellent fuel consumption over the whole range of engine speeds, through which the engine is economical in operation.

Maintenance is very easy, as supplementary equipment such as fuel injection pump, governor, water pump and turbocharger do not need any separate lubrication. The cylinder heads are individually divided by cylinder, and the engine has large inspection covers in crankcase and oilpan.

As the dimensions of the D25A MS engine are kept as small as possible, it takes up surprisingly little space. This

asset will be subscribed whole-heartedly by the person who is in charge of the engine room. An engine room equipped with this engine is a well-ordered engine room.

Warranty and Service

All Volvo Penta marine engines come with the additional benefit and security of the Cost Control Program, a unique system of operator support and financial control – from installation to after-sales service.

The optional international limited Volvo Penta three-year warranty provides the owner peace of mind. Qualified Volvo Penta dealers stand by for service and support in more than 100 countries all over the world.

Technical Data

Engine designation	D25A MS
No. of cylinders and configuration	in-line 6
Method of operation	4-stroke, direct-injected, turbocharged diesel engine with aftercooler
Bore, mm	170
Stroke, mm	180
Displacement, l	24.51
Compression ratio	14:1
Dry weight, kg	2300
Crankshaft power at calculated propeller load, Rating 1, kW (hp) 1600 rpm	440 (598)
Rating 2, kW (hp) 1650 rpm	485 (660)
Torque at calculated propeller load, Rating 1, Nm 1600 rpm	n.a.
Rating 2, Nm 1650 rpm	n.a.
Recommended fuel to conform to	ASTM No. 2-D
Specific fuel cons. at calculated propeller load, Rating 1, g/kWh 1600 rpm	n.a.
Rating 2, g/kWh 1650 rpm	n.a.

All data represent net performance with standard accessories such as fuel injection pump, water pump, L.O. pump and charging alternator under the conditions of 100kPa (750 mm Hg), barometric pressure 300K (27°C) ambient temperature and 60% relative humidity.

Standard Equipment:

Engine

- Flywheel housing with connection acc. to SAE 0
- Flywheel (18")
- Engine brackets

Lubrication system

- Fresh water cooled oil cooler
- Spin-on type oil filter with shift valve
- Spin-on type oil by-pass filter

Fuel system

- Hydraulic governor
- Jacketed fuel pipes
- Spin-on type fuel filter (change-over type)
- 24V fuel shut-off valve, electrically operated

Exhaust system

- Non-cooled turbocharger
- Air inlet filter/silencer

Cooling system

- Fresh water cooled exhaust manifold
- Fresh water cooled aftercooler with insulator cover
- Fresh water pump (V-belt driven)

Electrical system

- Starter motor (DC 24V-7.5kW)
- Alternator (24V-35A)

Other equipment

- Front P.T.O. pulley (2x B groove)
- Front safety cover
- Standard tools

Optional Equipment:

- Electrical system including wiring, senders, switches and terminal box mounted on engine
- Instrument panel for engine-room and wheel-house
- Air starting system on request
- Oil drain pump
- Flexible exhaust hose for dry exhaust line
- Dry exhaust silencer
- Fuel filter/water separator with shift valve
- Classification under regulations of: LR, ABS, DNV or GL
- Gearbox on request
- Spare parts
- Spare parts according to classification recommendations

Contact Volvo Penta for further information.

Not all models, standard equipment and accessories are available in all countries. All specifications are subject to change without notice.

The engine illustrated may not be entirely identical to production standard engines.

VOLVO PENTA INBOARD DIESEL

D34A MS

12-cylinder, 4-stroke, direct-injected, turbocharged marine diesel engine with aftercooler – crankshaft power* 701 kW (953 hp)

* Power rating – see Technical Data

Powerful and reliable engine for demanding operation in commercial applications

The Volvo Penta D34A MS engine is constructed to meet the most demanding requirements, such as marine main propulsion or marine generator drive. Its compactness and durability applies the most advanced technologies and engineering know-how; all this to benefit the operator.

The Volvo Penta D34A MS diesel engine is built to the highest quality standards recognized by all the major marine classification societies, such as Germanischer Lloyds, Norske Veritas etc. as well as the national Shipping Inspections.

Volvo Penta is continuously making intensive research work on the marine application of the engine to produce an engine with a compact design, which gives many advantages, such as low running costs in relation to high output.

An optimal combination of combustion chambers, fuel injection system, and effective turbocharger and charge air cooling system, provide an excellent fuel consumption over the whole range of engine speeds, through which the engine is economical in operation.

Maintenance is very easy, as supplementary equipment such as fuel injection pump, governor, water pump and turbocharger do not need any separate lubrication. The cylinder heads are individually divided by cylinder, and the engine has large inspection covers in crankcase and oilpan.

As the dimensions of the D34A MS engine are kept as small as possible, it takes up surprisingly little space. This

asset will be subscribed whole-heartedly by the person who is in charge of the engine room. An engine room equipped with this engine is a well-ordered engine room.

Warranty and Service

All Volvo Penta marine engines come with the additional benefit and security of the Cost Control Program, a unique system of operator support and financial control – from installation to after-sales service.

The optional international limited Volvo Penta three-year warranty provides the owner peace of mind. Qualified Volvo Penta dealers stand by for service and support in more than 100 countries all over the world.

Technical Data

Engine designation	D34A MS
No. of cylinders and configuration	V 12
Method of operation	4-stroke, direct-injected, turbocharged diesel engine with aftercooler
Bore, mm	150
Stroke, mm	160
Displacement, l	33.93
Compression ratio	14.5:1
Dry weight, kg	2920
Crankshaft power at calculated propeller load, Rating 1, kW (hp) 1940 rpm	634 (862)
Rating 2, kW (hp) 2000 rpm	701 (953)
Torque at calculated propeller load, Rating 1, Nm 1940 rpm	n.a.
Rating 2, Nm 2000 rpm	n.a.
Recommended fuel to conform to	ASTM No. 2-D
Specific fuel cons. at calculated propeller load, Rating 1, g/kWh 1940 rpm	n.a.
Rating 2, g/kWh 2000 rpm	n.a.

All data represent net performance with standard accessories such as fuel injection pump, water pump, L.O. pump and charging alternator under the conditions of 100kPa (750 mm Hg), barometric pressure 300K (27°C) ambient temperature and 60% relative humidity.

Standard Equipment:

Engine

- Flywheel housing with connection acc. to SAE 0
- Flywheel (18")
- Engine brackets

Lubrication system

- Fresh water cooled oil cooler
- Spin-on type oil filter with shift valve
- Spin-on type oil by-pass filter

Fuel system

- Hydraulic governor
- Jacketed fuel pipes
- Spin-on type fuel filter (change over type)
- 24V fuel shut-off valve, electrically operated

Exhaust system

- Dry exhaust manifold with insulator cover
- Non-cooled turbocharger
- Air inlet filter/silencer

Cooling system

- Fresh water cooled aftercooler with insulator cover
- Fresh water pump (V-belt driven)

Electrical system

- Starter motor (DC 24V-7.5kW)
- Alternator (24V-35A)

Other equipment

- Front P.T.O. pulley (2x B groove)
- Front safety cover
- Standard tools

Optional Equipment:

- Electrical system including wiring, senders, switches and terminal box mounted on engine
- Instrument panel for engine-room and wheel-house
- Air starting system on request
- Oil drain pump
- Flexible exhaust hose for dry exhaust line
- Dry exhaust silencer
- Fuel filter/water separator with shift valve
- Classification under regulations of: LR, ABS, DNV or GL
- Gearbox on request
- Spare parts
- Spare parts according to classification recommendations

Contact Volvo Penta for further information.

Not all models, standard equipment and accessories are available in all countries. All specifications are subject to change without notice.

The engine illustrated may not be entirely identical to production standard engines.

Powerful and reliable engine for demanding operation in commercial applications

The Volvo Penta D49A MT engine is constructed to meet the most demanding requirements, such as marine main propulsion or marine generator drive. Its compactness and durability applies the most advanced technologies and engineering know-how; all this to benefit the operator.

The Volvo Penta D49A MT diesel engine is built to the highest quality standards recognized by all the major marine classification societies, such as Germanischer Lloyds, Norske Veritas etc. as well as the national Shipping Inspections.

Volvo Penta is continuously making intensive research work on the marine application of the engine to produce an engine with a compact design, which gives many advantages, such as low running costs in relation to high output.

An optimal combination of combustion chambers, fuel injection system, and effective turbocharger and charge air cooling system, provide an excellent fuel consumption over the whole range of engine speeds, through which the engine is economical in operation.

Maintenance is very easy, as supplementary equipment such as fuel injection pump, governor, water pump and turbocharger do not need any separate lubrication. The cylinder heads are individually divided by cylinder, and the engine has large inspection covers in crankcase and oilpan.

As the dimensions of the D49A MT engine are kept as small as possible, it takes up surprisingly little space. This

asset will be subscribed whole-heartedly by the person who is in charge of the engine room. An engine room equipped with this engine is a well-ordered engine room.

Warranty and Service

All Volvo Penta marine engines come with the additional benefit and security of the Cost Control Program, a unique system of operator support and financial control – from installation to after-sales service.

The optional international limited Volvo Penta three-year warranty provides the owner peace of mind. Qualified Volvo Penta dealers stand by for service and support in more than 100 countries all over the world.

D49A MT

Technical Data

Engine designation	D49A MT
No. of cylinders and configuration	V 12
Method of operation	4-stroke, direct-injected, turbocharged diesel engine with aftercooler
Bore, mm	170
Stroke, mm	180
Displacement, l	49.03
Compression ratio	14:1
Dry weight, kg	4800
Crankshaft power at calculated propeller load, Rating 1, kW (hp) 1600 rpm	940 (1278)
Rating 2, kW (hp) 1650 rpm	1040 (1414)
Torque at calculated propeller load, Rating 1, Nm 1600 rpm	5833
Rating 2, Nm 1650 rpm	6258
Recommended fuel to conform to	ASTM No. 2-D
Specific fuel cons. at calculated propeller load, Rating 1, g/kWh 1600 rpm	196
Rating 2, g/kWh 1650 rpm	196

All data represent net performance with standard accessories such as fuel injection pump, water pump, L.O. pump and charging alternator under the conditions of 100kPa (750 mm Hg), barometric pressure 300K (27°C) ambient temperature and 60% relative humidity.

Standard Equipment:

Engine

- Flywheel housing with connection acc. to SAE 00
- Flywheel (21")
- Engine brackets

Lubrication system

- Fresh water cooled oil cooler
- Spin-on type oil filter with shift valve
- Spin-on type oil by-pass filter

Fuel system

- Hydraulic governor
- Jacketed fuel pipes
- Spin-on type fuel filter (change over type)
- 24V fuel shut-off valve, electrically operated

Exhaust system

- Dry exhaust manifold with insulator cover
- Non-cooled turbocharger
- Air inlet filter/silencer

Cooling system

- Raw water cooled aftercooler with insulator cover
- Fresh water pump (V-belt driven)
- Raw water pump (V-belt driven)

Electrical system

- Starter motor (DC 24V-7.5kW)
- Alternator (24V-35A)

Other equipment

- Front P.T.O. pulley (2x B groove)
- Front safety cover
- Standard tools

Optional Equipment:

- Electrical system including wiring, senders, switches and terminal box mounted on engine
- Instrument panel for engine-room and wheel-house
- Air starting system on request
- Oil drain pump
- Flexible exhaust hose for dry exhaust line
- Dry exhaust silencer
- Fuel filter/water separator with shift valve
- Classification under regulations of: LR, ABS, DNV or GL
- Gearbox on request
- Spare parts
- Spare parts according to classification recommendations

Contact Volvo Penta for further information.

Not all models, standard equipment and accessories are available in all countries. All specifications are subject to change without notice.

The engine illustrated may not be entirely identical to production standard engines.

NEW!

VOLVO PENTA INBOARD DIESEL

D12-400

6-cylinder, 4-stroke, direct-injected, turbocharged marine diesel engine with aftercooler – crankshaft power* 294 kW (400 hp)

* Power rating – see Technical Data

Excellent reliability and economy

The D12-400 marine diesel engine is specially designed and developed for installations in heavy duty commercial displacement craft, featuring the latest advanced diesel technology.

To meet the tough and demanding reliability and durability demands from operators and fleet owners, the D12-400 is tried and tested in the world's most extensive and toughest test program. 40 man-years behind the design and 25 man-years in tests, which equals eight times around the world, ensures excellent reliability and durability.

Excellent drivability is assured with high low-end and a rich torque curve matched to the power outputs for fast and immediate response.

Low fuel consumption for long operational range and low operational cost and emission levels is assured with:

- Electronic Unit Injectors
- 4-valve technology
- Electronically controlled injection timing
- High pressure 8-hole injector nozzles
- Electronic governing – EDC

This technology combined optimizes engine performance and efficiency, ensures efficient combustion by injecting the right quantity of fuel at the right time which minimizes quantity of unburned fuel, reducing fuel consumption and exhaust emission levels. The Volvo Penta D12-400 fuel system is designed to give full output regardless of fuel temperature.

This technology in combination with the electronic governing, EDC, protects the engine from major breakdowns, which further enhances the high reliability and long service life for low operational costs.

High quality

The D12-400 is built in the world's most highly automated diesel engine factory line with a totally robotic machining and assembly line with computer controlled audit checks, which ensures the highest quality level.

Operation and comfort

Electronic remote controls, push button twin engine synchronization and change of active station ensures easy and smooth operation and maneuvering.

The electrical control levers are operated more smoothly and precisely, requiring much less force.

Automatic twin engine synchronization reduces noise and vibration levels, and increases service life of engine.

This, in combination with the well-balanced D12-400 in-line six cylinder engine with powerfully dimensioned crankshaft bearings and vibration damper on camshaft, ensures smooth, vibration-free operation with low noise levels.

Low exhaust emission levels

The D12-400 advanced diesel technology greatly contributes to more efficient combustion with higher power and reduced noxious exhaust emissions.

D12-400 complies with the IMO emission regulations.

Easy installation

The D12-400 gives a time saving and reliable installation, as it is a complete delivered compact and tailor-made propulsion system from one single supplier.

Plug-in water protected harnesses and connectors, compact dimensions, and the EDC system ensures an easy, simple and time-saving installation.

Ease of service and maintenance

The EDC system features a self-diagnostic facility. Easily accessible service and main-

tenance points contributes to the ease of service of the engine.

Worldwide service support in more than 100 countries

The Volvo Penta parts and service dealer network is a truly international operation with authorized service dealers around the world. These service centers offer Genuine Volvo Penta parts as well as skilled personnel to ensure the best possible service. Continuous and thorough product and service training ensures that Volvo Penta products are well supported.

D12-400 – a true marine engine from a true marine engine company

The D12-400 is a true marine engine, as it is developed by a true marine company with the best there is to be found in marine experience and know-how, and built and assembled with the best production method there is to be found in the world.

The D12-400 delivers excellent reliability, economy and durability, in combination with the highest level of quality.

D12-400

Technical Data

Engine designation	D12D MH
No. of cylinders and configuration	in-line 6
Method of operation	4-stroke, direct-injected, turbocharged diesel engine with aftercooler
Bore, mm (in.)	131 (5.16)
Stroke, mm (in.)	150 (5.91)
Displacement, l (in ³)	12.13 (740.2)
Compression ratio	17.5:1
Dry weight, kg (lb)	1400 (3086)
Dry weight with reverse gear	
MG5114SC, kg (lb)	1603 (3534)
MG5114DC, kg (lb)	1768 (3898)
Crankshaft power, kW (hp) @ 1800 rpm	294 (400)
Torque, Nm (lbf.ft.) @ 1800 rpm	1560 (1150)
Recommended fuel to conform to	ASTM-D975 1-D & 2-D, EN 590 or JIS KK 2204

Specific fuel consumption,
g/kWh (lb/hph) @ 1800 rpm 207 (0.335)

Technical data according to ISO 3046 Fuel Stop Power and ISO 8665. Fuel with a lower calorific value of 42700 kJ/kg and density of 840 g/liter at 15 °C (60 °F). Merchant fuel may differ from this specification which will influence engine power output and fuel consumption.

Rating: 1

The engine complies with the IMO emission regulations.

Technical description:

Engine and block

- Cylinder block and cylinder head made of cast-iron
- One piece cylinder head
- Replaceable wet cylinder liners and valve seats/guides
- Drop forged crankshaft with induction hardened bearing surfaces and fillets with seven main bearings
- Four valve per cylinder layout with overhead camshaft

- Each cylinder features cross-flow inlet and exhaust ducts
- Gallery oil cooled forged aluminium pistons
- Three piston rings

Lubrication system

- Integrated oil cooler in cylinder block
- Twin full flow oil filter of spin-on type and by-pass filter

Fuel system

- Six Electronic Unit Injectors, one per cylinder, vertically positioned at the center in between the four valves
- Gear driven fuel pump, driven by timing gear
- Electronic controlled central processing system (EDC – Electronic Diesel Control)
- Electronically controlled injection timing
- 5-hole high pressure injector nozzles
- Single fine fuel filter of spin-on type, with water separator

Turbocharger

- Fresh water cooled turbo charger

Cooling system

- Fresh water cooled charge air cooler
- Gear driven coolant pumps
- Tubular heat exchanger or single-circuit keel cooling

Electrical system

- 24V electrical system, 24V/60A alternator

Reverse gear

- MG5114SC/DC, electrically shifted

Optional equipment

VOLVO PENTA INBOARD DIESEL

D12-550

6-cylinder, 4-stroke, direct-injected, turbocharged marine diesel engine with aftercooler – crankshaft power* 405 kW (550 hp)

* Power rating – see Technical Data

Excellent reliability and economy

The D12-550 marine diesel engine is specially designed and developed for installations in heavy duty commercial displacement craft, featuring the latest advanced diesel technology.

To meet the tough and demanding reliability and durability demands from operators and fleet owners, the D12-550 is tried and tested in the world's most extensive and toughest test program. 40 man-years behind the design and 25 man-years in tests, which equals eight times around the world, ensures excellent reliability and durability.

Excellent drivability is assured with high low-end and a rich torque curve matched to the power outputs for fast and immediate response.

Low fuel consumption for long operational range and low operational cost and emission levels is assured with:

- Electronic Unit Injectors
- 4-valve technology
- Electronically controlled injection timing
- High pressure 8-hole injector nozzles
- Electronic governing – EDC

This technology combined optimizes engine performance and efficiency, ensures efficient combustion by injecting the right quantity of fuel at the right time which minimizes quantity of unburned fuel, reducing fuel consumption and exhaust emission levels. The Volvo Penta D12-550 fuel system is designed to give full output regardless of fuel temperature.

This technology in combination with the electronic governing, EDC, protects the engine from major breakdowns, which further enhances the high reliability and long service life for low operational costs.

High quality

The D12-550 is built in the world's most highly automated diesel engine factory line with a totally robotic machining and assembly line with computer controlled audit checks, which ensures the highest quality level.

Operation and comfort

Electronic remote controls, push button twin engine synchronization and change of active station ensures easy and smooth operation and maneuvering.

The electrical control levers are operated more smoothly and precisely, requiring much less force.

Automatic twin engine synchronization reduces noise and vibration levels, and increases service life of engine.

This, in combination with the well-balanced D12-550 in-line six cylinder engine with powerfully dimensioned crankshaft bearings and vibration damper on camshaft, ensures smooth, vibration-free operation with low noise levels.

Low exhaust emission levels

The D12-550 advanced diesel technology greatly contributes to more efficient combustion with higher power and reduced noxious exhaust emissions.

D12-550 complies with the IMO emission regulations.

Easy installation

The D12-550 gives a time saving and reliable installation, as it is a complete delivered compact and tailor-made propulsion system from one single supplier.

Plug-in water protected harnesses and connectors, compact dimensions, and the EDC system ensures an easy, simple and time-saving installation.

Ease of service and maintenance

The EDC system features a self-diagnostic facility. Easily accessible service and main-

tenance points contributes to the ease of service of the engine.

Worldwide service support in more than 100 countries

The Volvo Penta parts and service dealer network is a truly international operation with authorized service dealers around the world. These service centers offer Genuine Volvo Penta parts as well as skilled personnel to ensure the best possible service. Continuous and thorough product and service training ensures that Volvo Penta products are well supported.

VOLVO PENTA INBOARD DIESEL

D12-615

6-cylinder, 4-stroke, direct-injected, turbocharged marine diesel engine with aftercooler – crankshaft power* 452 kW (615 hp)

* Power rating – see Technical Data

Excellent Performance and Cruising Range

The D12-615 marine diesel engine is specially designed and developed for installations in fast planing craft featuring the latest advanced diesel technology.

Excellent performance is assured with a rich torque curve matched to the high power output for quick out of the hole acceleration and high top and cruising speed.

Low fuel consumption for long cruising range and low emission levels is assured with:

- Electronic Unit Injectors
- 4-valve technology
- Electronically controlled injection timing
- High pressure 8-hole injector nozzles
- EDC governing

This technology combined optimizes engine performance and efficiency, ensures efficient combustion by injecting the right quantity of fuel at the right time which minimizes quantity of unburned fuel, reducing fuel consumption and exhaust emission levels. The Volvo Penta D12-615 fuel system is designed to give full output regardless of fuel temperature.

This technology, in combination with the high power output, gives the boat a wider operating range in combination with higher speed.

High quality

The D12-615 is built in the world's most highly automated diesel engine factory line with a totally robotic machining and assembly line with computer controlled audit checks, which ensures the highest quality level.

The D12-615 is a further development of the well proven Volvo Penta in-line six engine concept which ensures high reliability and long term durability.

Operation and comfort

Electronic remote controls, push button twin engine synchronization and change of active station ensures easy and smooth operation and maneuvering.

The electrical control levers are operated more smoothly and precisely, requiring much less force.

Automatic twin engine synchronization reduces noise and vibration levels, and increases service life of engine.

This in combination with the well-balanced D12-615 in-line six cylinder engine with powerfully dimensioned crankshaft bearings and vibration damper on camshaft ensures smooth, vibration-free operation with low noise levels.

Low exhaust emission levels

The D12-615 advanced diesel technology greatly contributes to more efficient combustion with higher power and reduced noxious exhaust emissions.

D12-615 complies with the IMO emission regulations.

Easy installation

The D12-615 gives a time saving and reliable installation as it is a complete delivered compact and tailor-made propulsion system from one single supplier.

Plug-in water protected harnesses and connectors, compact dimensions and the EDC system ensures an easy, simple and time-saving installation.

Ease of service and maintenance

The EDC system features a self-diagnostic facility. Easily accessible service and maintenance

points contributes to the ease of service of the engine.

The Volvo Penta D12-700 fuel system is designed to give full output regardless of fuel temperature.

This technology, in combination with the high power output, gives the boat a wider operating range in combination with higher speed.

High quality

The D12-700 is built in the world's most highly automated diesel engine factory line with a totally robotic machining and assembly line with computer controlled audit checks, which ensures the highest quality level.

The D12-700 is a further development of the well proven Volvo Penta in-line six engine concept which ensures high reliability and long term durability.

Operation and comfort

Electronic remote controls, push button twin engine synchronization and change of active station ensures easy and smooth operation and maneuvering.

The electrical control levers are operated more smoothly and precisely, requiring much less force.

Automatic twin engine synchronization reduces noise and vibration levels, and increases service life of engine.

This in combination with the well-balanced D12-700 in-line six cylinder engine with powerfully dimensioned crankshaft bearings and vibration damper on camshaft ensures smooth, vibration-free operation with low noise levels.

Low exhaust emission levels

The D12-700 advanced diesel technology greatly contributes to more efficient combustion with higher power and reduced noxious exhaust emissions.

D12-700 complies with the IMO emission regulations.

Easy installation

The D12-700 gives a time saving and reliable installation as it is a complete delivered compact and tailor-made propulsion system from one single supplier.

Plug-in water protected harnesses and connectors, compact dimensions and the EDC system ensures an easy, simple and time-saving installation.

Ease of service and maintenance

The EDC system features a self-diagnostic facility. Easily accessible service and main-

tenance points contributes to the ease of service of the engine.

Worldwide service support in more than 100 countries

The Volvo Penta parts and service dealer network is a truly international operation with authorized service dealers around the world. These service centers offer Genuine Volvo Penta parts as well as skilled personnel to ensure the best possible service. Continuous and thorough product and service training ensures that Volvo Penta products are well supported.

D12-700 – a true marine engine from a true marine engine company

The D12-700 is a true marine engine as it is developed by a true marine company with the best there is to be found in marine experience and know-how, and built and assembled with the best production method there is to be found in the world.

The D12-700 delivers excellent performance and cruising range, high reliability and durability, in combination with the highest level of quality.

D12-700

Technical Data

Engine designation	D12C MP
No. of cylinders and configuration	in-line 6
Method of operation	4-stroke, direct-injected, turbocharged diesel engine with aftercooler
Bore, mm (in.)	131 (5.16)
Stroke, mm (in.)	150 (5.91)
Displacement, l (in ³)	12.13 (740.2)
Compression ratio	16.5:1
Dry weight, kg (lb)	1400 (3086)
Dry weight with reverse gear	
ZF 325A-EB, kg (lb)	1570 (3461)
Crankshaft power, kW (hp) @ 2300 rpm	515 (700)
Torque, Nm (lbf.ft) @ 2300 rpm	2138 (1577)
Recommended fuel to conform to	ASTM-D975 1-D & 2-D, EN 590 or JIS KK 2204

Specific fuel consumption,
g/kWh (lb/hph) @ 2300 rpm 221 (0.358)

Technical data according to ISO 3046 Fuel Stop Power and ISO 8665. Fuel with a lower calorific value of 42700 kJ/kg and density of 840 g/liter at 15 °C (60 °F). Merchant fuel may differ from this specification which will influence engine power output and fuel consumption.

Rating: 5

The engine complies with the IMO emission regulations.

- Each cylinder features cross-flow inlet and exhaust ducts
- Gallery oil cooled forged aluminium pistons
- Three piston rings

Lubrication system

- Integrated oil cooler in cylinder block
- Twin full flow oil filter of spin-on type and by-pass filter

Fuel system

- Six Electronic Unit Injectors, one per cylinder, vertically positioned at the center in between the four valves
- Gear driven fuel pump, driven by timing gear
- Electronic controlled central processing system (EDC – Electronic Diesel Control)
- Electronically controlled injection timing
- 8-hole high pressure injector nozzles
- Single fine fuel filter of spin-on type, with water separator

Turbocharger

- Fresh water cooled turbo charger

Cooling system

- Fresh water cooled charge air cooler
- Gear driven coolant pumps
- Tubular heat exchanger or single-circuit keel cooling

Electrical system

- 24V electrical system, 24V/60A alternator

Reverse gear

- ZF 325A-EB, electrically shifted

Optional equipment

Contact your Volvo Penta representative.

Not all models, standard equipment and accessories are available in all countries. All specifications are subject to change without notice.

The engine illustrated may not be entirely identical to production standard engines.

Technical description:

Engine and block

- Cylinder block and cylinder head made of cast-iron
- One piece cylinder head
- Replaceable wet cylinder liners and valve seats/guides
- Drop forged crankshaft with induction hardened bearing surfaces and fillets with seven main bearings
- Four valve per cylinder layout with overhead camshaft

NEW!

VOLVO PENTA INBOARD DIESEL

D2-55

4-cylinder, freshwater-cooled marine diesel engine
Crankshaft power* 41 kW (55 hp)

* Crankshaft power according to ISO 8665

The D2-55 is a marine engine of advanced design manufactured from quality components and designed to fulfil customer requirements.

Service Life

The D2-55 is fitted with freshwater cooling as standard. This reduces internal corrosion and enables the engine to maintain a consistent and optimal working temperature under all conditions.

To avoid galvanic corrosion the engine is equipped with the unique electrical insulation between engine and S-drive.

Comfort

Smooth running with very low vibration levels results from a dynamically balanced design incorporating a flywheel of high rotating mass and high efficiency rubber insulation.

The engine's high torque provides excellent operating characteristics to aid maneuvering, particularly in confined spaces.

Additional on board comfort features are available from an extensive range of matched accessories.

Environment

An advanced combustion system increases fuel burning efficiency to minimize noxious exhaust emissions and enhance overall enjoyment of boating. The D2-55 is certified according to BSO II and SAV.

Transmissions

Eight matched transmission options are available, each built for durability and smooth running.

Technical description:

Engine and block

- Cylinder block and cylinder head manufactured from high grade cast iron. Crankcase features a rigid tunnel block design.
- Chrome molybdenum forged crankshaft, statically and dynamically balanced with integral counterweights. Pistons are cast from high silicon aluminum, are heat treated and fitted with two cast iron, chromium faced compression rings and a single oil ring.
- Replaceable, hardened valve seats
- Elastic coupling on flywheel

D2-55 with MS25S S-Drive

Engine mounting

- Tuned front and rear cushion-type rubber mounts. Adjustable.

Lubrication system

- Spin-on fullflow oil filter
- Separate oil scavenger pipe
- Closed circuit crankcase ventilation

Fuel system

- Flange mounted, cam driven in-line injection pump
- Feed pump with hand primer
- Spin-on type fine fuel filter

Exhaust system

- Freshwater cooled exhaust manifold and seawater cooled exhaust elbow

Cooling system

- Freshwater cooling system governed by thermostat
- Tubular heat exchanger with integral expansion tank
- Coolant system prepared for hot water outlet fittings
- Easily accessible sea water pump and impeller

Electrical system

- 12V corrosion-protected electrical system
- 14V/60A marine alternator
- Charging regulator with electronic sensor for voltage drop compensation
- Glow plugs for excellent cold starting
- Electric starter motor (2.0 kW output)
- Extension cable harness with plug-in connection available in various lengths

VOLVO PENTA

D2-55

Choice of instrument panel:

Standard panel, including:

- Optional rev counter incl. hour counter
- Start button or key switch
- Alarm (for monitoring temperature, oil pressure and charge rate)
- Instrument panel lighting
- Switch for alarm test and glow

De Luxe panel including:

- Optional rev counter incl. hour counter
- Key switch
- Temperature gauge
- Oil pressure gauge
- Voltmeter
- Alarm (for monitoring temperature, oil pressure and charge rate)
- Instrument panel lighting
- Alarm test button

Choice of transmissions:

HS25A Hydraulic – drop center with 8° down angled output shaft. Trolling valve kit available.

- Ratio 2,29:1/2,29:1 (RH/LH) and 2,71:1/2,71:1 (RH/LH).

MS25A Mechanical – drop center with 8° down angled output shaft.

- Ratio 2.23:1/2.74:1 (RH/LH) and 2.74:1/2.74:1 (RH/LH).

MS25L Mechanical – drop center with straight output shaft.

- Ratio 2.27:1/2.10:1 (RH/LH) and 2.74:1/2.72:1 (RH/LH).

S-drive MS25S and **MS25SR** for reverse installation of engine. Ratio 2.19:1.

Accessories

- Engine controls and steering systems
- Additional instrument panels and instruments
- Extra alternator kits
- Battery and battery switches
- Hot water systems
- Separate expansion tanks
- Cooling water seacocks, strainers and hoses
- Exhaust systems and hull fittings
- Fuel systems including filters, pipes etc.
- Pulleys and universal brackets for power take-off (PTO)
- Propeller shaft systems and propellers
- Chemical products – paints, oils, cleaners etc.

VOLVO PENTA INBOARD DIESEL

D5A T

4-cylinder, 4-stroke, direct-injected, turbocharged marine diesel engine
crankshaft power* 72–95 kW (98–129 hp)

* Power rating – see Technical Data

Reliable and powerful

The D5A T is a highly reliable, type approved, marine diesel engine. Well-matched engine speed to rated power with excellent torque characteristics along with a variety of power take-off options makes it particularly well suited for displacement and semi-planing workboats in medium and heavy duty service.

Robust and silent

A rigid in-line cylinder block with generously dimensioned crankshaft bearings, together with watercooled exhaust manifold and turbo, are just some of the design features making this silent running and sturdy engine. The owner of a D5A T not only benefits from many hours of trouble-free operation, but also enjoys improved onboard comfort.

Economical and service friendly

Price is not the only concern when investing in a new engine. As confirmed by marine professionals, it is the operational costs, such as cost for fuel, spare parts, service and maintenance, that makes the real difference in economy.

The D5A T is equipped with unit pumps that control the fuel distribution for each cylinder. Six-hole high-pressure injection nozzles optimize the fuel-air mixture. This improved combustion results in high thermal efficiency, low fuel consumption, reduced exhaust emissions, faster response to load variations and ease in maintenance.

Easily accessible maintenance points and single side servicing contribute to the ease of servicing the engine. Liners of wet and replaceable type, inclined connecting rod caps and replaceable valve seats make even major maintenance possible to carry out on-board.

Safely supported

Volvo Penta has a well-established, well-trained, network of authorized service dealers in more than 100 countries throughout the world. These service centers offer Genuine Volvo Penta Parts as well as skilled service personnel to help you protect your investment.

Technical description:

Engine and block

- Cylinder block, head and flywheel housing made of cast iron
- Belt guard
- Combined 10" and 11.5" flywheel with SAE 3 housing
- Nitrocarburized transmission gears
- Press-hardened crankshaft
- Forged aluminum pistons
- Cylinder liners of wet type

Lubrication system

- Oil filler in valve cover
- Oil sump made of cast iron
- Manual oil drain pump
- Rotary lubrication oil pump
- Freshwater-cooled oil cooler
- Full flow oil filters of spin-on type
- Closed crankcase ventilation system

Fuel system

- Fuel feed pump
- Fine fuel filter of spin-on type
- Unit pumps
- Six-hole injectors
- Mechanical governor with smoke limiter
- Fuel stopping solenoid 24V

Cooling system

- 1-circuit keel cooling system with expansion tank
- Belt-driven freshwater pump
- Freshwater-cooled turbocharger and exhaust manifold

Electrical system

- 2-pole 24V electrical system, 24V/55A alternator, 24V 4kW starter
- Senders and switches:
 - Tachometer
 - Lubrication oil pressure
 - Cooling-water temperature
 - Cooling-water level
- Rubber-suspended electrical terminal box with semi-automatic fuses and plug-in connection

- Flexible suspension for engine and reverse gear
- Combined 10"/11.5" flywheel with SAE 3 housing

Lubrication system

- Shallow oil sump
- Twin oil filters, for remote mounting

Fuel system

- Hand pump
- Jacketed fuel pipes
- Single or twin fuel/water separating pre filter
- Twin fuel filters, for remote mounting

Exhaust system

- Exhaust elbow, wet
- Exhaust elbow, dry, with integrated flexible compensator
- Silencer, dry

Cooling system

- Engine-mounted tubular heat exchanger with integrated expansion tank
- Seawater filter

Electrical system

- 1-pole 12V electrical system, 12V/95A alternator, 12V/3.1kW starter
- 24V/140A alternator
- Engine heater 230V/820W
- Senders and switches:
 - Charge air pressure
 - Gearbox oil pressure
- Cable harness in different lengths
- Various instrument panels

Power transmission

- PTO crankshaft front end, type stub shaft
- Hydraulic pump for steering and other duties

Reverse gear

- ZF220
- ZF280

VOLVO PENTA INBOARD DIESEL

D7C TA

6-cylinder, 4-stroke, direct-injected, turbocharged marine diesel engine with aftercooler – crankshaft power* 146–195 kW (199–265 hp)

* Power rating – see Technical Data

Reliable and powerful

The D7C TA is a reliable, powerful engine. It is a 6-cylinder, 4-stroke, direct-injected, turbocharged marine diesel engine with aftercooler. The engine is designed for long service life and high performance. It is suitable for use in a wide range of marine applications.

Robust and silent

The D7C TA is a robust and silent engine. It is designed to operate at low noise levels, making it ideal for use in recreational and commercial marine applications. The engine is built with high-quality materials and components to ensure long service life and reliability.

Economical and service friendly

The D7C TA is an economical and service friendly engine. It is designed to operate at low fuel consumption rates, making it ideal for use in applications where fuel economy is important. The engine is also easy to service and maintain, with a simple and accessible design.

The D7C TA is a 6-cylinder, 4-stroke, direct-injected, turbocharged marine diesel engine with aftercooler. It is designed for long service life and high performance. The engine is suitable for use in a wide range of marine applications. It is a reliable, powerful, robust, and silent engine. It is also economical and service friendly. The engine is built with high-quality materials and components to ensure long service life and reliability.

Safely supported

The D7C TA is a safely supported engine. It is designed to be mounted on a sturdy base, ensuring safe and secure operation. The engine is also equipped with various safety features to protect the operator and the vessel.

Technical description:

Engine and block

- Cylinders: 6
- Bore: 102 mm
- Stroke: 115 mm
- SAE 2
- Net power: 146–195 kW (199–265 hp)
- Fuel consumption: 100 g/kWh
- Torque: 100 Nm
- Gross weight: 100 kg
- Volvo Penta

Lubrication system

- Oil: 10W/40
- Oil change interval: 1000 hours
- Maintenance: 1000 hours
- Replacement: 1000 hours
- Filter: 1000 hours
- Clean: 1000 hours

Fuel system

- Fuel: 100% diesel
- Fuel filter: 1000 hours
- Unit: 1000 hours
- Service: 1000 hours
- Maintenance: 1000 hours
- Fuel consumption: 100 g/kWh
- Fuel system: 24V

Cooling system

- 2-stroke: 1000 hours
- Gasket: 1000 hours
- Bolt: 1000 hours
- Fuel: 1000 hours
- Fuel system: 24V

Electrical system

- 24V/55A
- 24V/4 W
- Service: 1000 hours
- Tag: 1000 hours
- L: 1000 hours
- C: 1000 hours
- C: 1000 hours
- R: 1000 hours

VOLVO PENTA INBOARD DIESEL KAMD300

6-cylinder, 24-valve, direct-injected marine diesel engine with charge air compressor, turbocharger, aftercooler and reverse gear. 210 kW (285 hp)*

* Crankshaft power according to ISO 8665

Compressor-charged Hi-Tech propulsion package

Volvo Penta's 6-cylinder KAMD300 is packed with virtually everything. Compressor, turbo and aftercooler, which are precisely controlled by the EDC system (Electronic Diesel Control), all help to produce unmatched diesel performance.

The compressor – fitted with silencers – is controlled by the EDC unit and acts as a "torque controller". It supplies compressed air at low engine speed and while accelerating, when the extra torque is needed.

The interaction of compressor and turbo produces high torque over the whole speed range, and this contributes to cleaner exhaust gases and fuel economy, giving excellent acceleration and driving characteristics.

Innovative EDC

Equipped with EDC (Electronic Diesel Control) – an electronically controlled processing system, which optimizes engine performance. The system determines the precise quantity of fuel required at any given moment, taking full account of variation in operating temperatures, air pressure and other contributing factors.

A great advantage with the EDC system is its monitoring of fuel temperature, which keeps the engine on a constant output from 5 to 55°C (41–131°F).

The EDC system includes electric shift and throttle control with wiring giving precise and smooth operation, with no noise transmitted along the cables.

If twin engines are fitted, a synchronizing function keeps the engines on the same rpm.

High output, excellent power/weight ratio

The engine is compact, and has an advantageous weight to power ratio making it excellent for both single- and multi-engine installation in planing craft.

KAMD300 with HS63AE reverse gear

Low exhaust emission levels

Direct injection, 4-valve technology, EDC and the advanced combustion system all minimize noxious exhaust emissions and enhance overall enjoyment of boating.

The engine complies with the IMO and SAV-1 emission regulations.

A propulsion package fully matched, tested and supported by one company

Volvo Penta's hydraulically shifted reverse gear has been specially developed with a view to increasing the standard of comfort on board in terms of quiet running, greater reliability and enhanced efficiency.

These benefits originate from a hydraulic shifting mechanism and a gear technology that uses bevel gears throughout the gear train.

The combination of 8° down angle, large drop center and small dimensions provides for optimized installations.

At Volvo Penta, focus is on developing the complete drive line ensuring perfectly matched engine/transmission packages for high torque, operational reliability, reduction of engine noise and vibrations.

In order to get full benefit of the EDC system the reverse gear is equipped with electromagnetic valves for electric gear shifting.

Easy installation and maintenance

Electronic control and instrument wiring are of plug-in type. The EDC system includes a self-diagnostic facility.

The EDC system makes planning and performing multi-installations easy.

Easily accessible service and maintenance points contribute to the ease of service of the engine.

Comprehensive service network

Volvo Penta has a well-established network of authorized service dealers in more than 100 countries throughout the world. These service centers offer Genuine Volvo Penta Parts as well as skilled personnel to ensure that you enjoy the best possible service.

VOLVO PENTA

KAMD300

Technical description:

Engine and block

- Cylinder block and cylinder head made of cast iron for good corrosion resistance and long service life
- 4-valve technology
- Oil-cooled pistons with two compression rings and one oil scraper ring
- Replaceable wet cylinder liners
- Replaceable valve seats
- Seven-bearing crankshaft

Engine mounting

- Elastic suspension consisting of 4 rubber pads with adjustable anchorage plates for dampening of sound and vibration

Lubrication system

- Pressure lubrication system with easily replaceable full-flow oil filter
- Tubular oil cooler that can be cleaned

Fuel system

- Rotor-type injection pump with electronic actuator
- EDC unit for processing the input for precise engine governing
- Two-stage injectors
- Fine filter with water separator
- Feed pump with hand primer
- Electrically operated stopping device

Air inlet and exhaust system

- Inlet system designed to produce optimal air rotation which provides perfect combustion
- Air inlet silencer with replaceable filter
- Crankcase gases vented into the air inlet
- Seawater-cooled exhaust elbow of cast iron with a stainless steel insert
- Exhaust-driven freshwater-cooled turbo-charger
- Belt-driven compressor with silencer of absorption type on both inlet and outlet port

Cooling system

- Thermostatically regulated freshwater cooling
- Tubular heat exchanger with separate transparent expansion tank
- Coolant system prepared for hot water outlet
- Easily accessible seawater impeller pump

Electrical system

- 12V two-pole electrical system
- 14V/60A marine alternator with Zener-diodes to protect entire system from peak voltage
- Charging regulator with battery sensor for voltage drop compensation
- Automatic fuses with manual reset
- Starter motor power 3.0 kW
- Extension cable harness with plug-in connection available in various lengths

Instruments/control

- Complete instrument panel with key switch, instruments and interlocked alarm. Alternatively separate instruments.
- EDC monitoring panels for single or twin installations
- Electronic remote control for throttle and shift
- Plug-in connections for both EDC and electrics

Reverse gear

- Reverse gear with matched drop center and 8° down angle for compact installation and minimum propeller shaft angle. V-drive available.
- Bevel gears which results in smooth running at all speeds
- Hydraulically operated clutch for smooth shifting
- Electrical shifting performed by electromagnetic valves
- When under sail propeller shaft can rotate 24 hours without engine start
- Seawater-cooled oilcooler
- Trolling valve available

Accessories

An extensive range of accessories are available. For detailed information, please see Accessory catalogs.

VOLVO PENTA INDUSTRIAL DIESEL

TAD520VE

Engine for industrial applications
118 kW (160 hp)

The TAD520VE is a powerful, reliable and economical Versatile Diesel Engine.

Durability & low noise

Designed for easiest, fastest and most economical installation. Well-balanced to produce smooth and vibration-free operation with low noise level.

To maintain a controlled working temperature in cylinders and combustion chambers, the engine is equipped with piston cooling.

Low exhaust emissions

The state of the art, high-tech injection and charging system with low internal losses contributes to excellent combustion and low fuel consumption.

The TAD520VE complies with present and coming exhaust emission regulations in both USA and Europe

Easy service & maintenance

Modern injection system, integrated oil cooler and all service points located on one side provides best possible access in an installation. Replaceable cylinder liners valve guides and valve seats gives lower service and repair costs for the customer. Quality Volvo Penta support is available in more than 100 countries all over the world. No matter where the equipment ends up, the end user will have a local Volvo Penta support.

Technical description:

Engine and block

- Optimized cast iron cylinder block with optimum distribution of forces
- Piston cooling for low piston temperature and reduced ring temperature
- Drop forged steel connecting rods for reduce risk of piston cracking
- Crankshaft hardened bearing surfaces and fillets for moderate load on main and high-end bearings
- Keystone top compression rings for long service life
- Replaceable valve guides and valve seats
- Three PTO positions at flywheel end
- Lift eyelets
- Flywheel housing with connection acc to SAE 3
- Flywheel for flexible coupling and friction clutch
- Transport brackets

Features

- Compact design
- High power to weight ratio
- Emission compliant
- Noise optimized engine design
- A wide selection of optional equipment and power settings

Lubrication system

- Full flow disposable spin-on oil filter, for extra high filtration
- Rotary displ oil pump driven by the crankshaft
- Deep centre oil sump, 35° inclination
- Oil filler on valve cover
- Oil dipstick, right side, front
- Integrated full flow oil cooler, side-mounted

Fuel system

- Six hole fuel injection nozzles
- Direct injection unit pump with smoke limiter function
- Washable fuel prefilter with water separator
- Belt driven rotary low-pressure fuel pump
- Fine fuel filter of disposable type
- Fuel shut-off solenoid, electrically operated, 24 V

Intake and exhaust system

- Connection flange for exhaust line
- Turbo charger, centre low with exhaust flange
- Closed crankcase ventilation

Cooling system

- Belt driven, maintenance-free coolant pump with high degree of efficiency
- Efficient cooling with accurate coolant control through a water distribution duct in the cylinder block. Reliable sleeve thermostat with minimum pressure drop
- Cooling water pipe, inlet and outlet
- Fan hub
- Fan at separate bracket 292mm above crankshaft
- Suction fan type 470mm

Electrical system

- 24V electrical system
- Alternator 1x55A / 24V, low left
- Starter motor, Bosch, 4.0 kW/24 V, single pole
- Oil pressure switch
- Temperature sender, 113 °C

**VOLVO
PENTA**

TAD520VE

Optional equipment

Engine

- Intermittent and Continuous power settings Tier 1 or Com 1 compliance
- SAE 2 or SAE 3 flywheel housings, flywheel for clutch SAE 8", 10" and 11 1/2"
- Flywheel Clark, ZF, and Allison transmissions

Lubrication system

- Central or deep front oil sump
- Oil dipstick above cylinder head
- Remote oil filter
- Oil filling on top and/or crankcase

Fuel system

- Fuel prefilter (standard or heavy duty)
- Hand pump

Intake and exhaust system

- Low or high turbocharger
- Exhaust to front or rear
- Electric or mechanic air restriction indicator , 50mbar

Cooling system

- Fan at separate bracket 210, 234, 292 or 398 mm above crankshaft
- Fan on coolant pump
- Fan on crankshaft
- Fan ratio 1:1,0 - 1:1,12 - 1:1.26
- Suction or pusher type fans 470-700mm
- 2 fixed fan hubs, and 2 viscous type hubs.

Control system

- 12V/24V electrical stop, energized to run or to stop
- VDO-E-Gas

Electrical system

- Alternator, 28V / 55-80 A high right or 28V / 55-140 A low left
- Alternator, 14V / 95 A high right or low left
- Starter motor, 24V / 4,0 or 4,8 kW
- Starter motor, 12V / 3,1kW
- Speed sender, Hourmeter, Oilpressure sender and switch

Miscellaneous

- Driving parts for hydr. pump on PTO A and C
- Hydr. pump on PTO B, 16cm³
- Coolant preheater
- Pulley for AC compressor
- Air compressor, 105 cm³, 300 cm³ or 300 cm³ with powersteering pump

Technical Data

Engine designation	TAD520VE
IFN Power at 2300rpm, kW (hp)	118 (160)
ICFN Power at 2300rpm, kW (hp)	107 (146)
Torque at 1400rpm, Nm (lbf ft)	577 (426)
Displacement, l (in³)	4.76 (290)
Number of cylinders	4
Bore/stroke, mm (in.)	108/130 (4.25/5.12)
Compression ratio, COMII / EPA 1	19.0:1 / 18.1:1
Dry weight, kg (lb)	430 (948)

The engine performance corresponds to ISO 3046, BS 5514 and DIN 6271. The technical data applies to an engine without cooling fan and operating on a fuel with calorific value of 42.7 MJ/kg (18360 BTU/lb) and a density of 0.84 kg/litre (7.01 lb/US gal, 8.42 lb/Imp gal), also where this involves a deviation from the standards.

Dimensions TAD520VE

Not for installation

Power Standards

The engine performance corresponds to ISO 3046, BS 5514 and DIN 6271. The technical data applies to an engine without cooling fan and operating on a fuel with calorific value of 42.7 MJ/kg (18360 BTU/lb) and a density of 0.84 kg/litre (7.01 lb/US gal, 8.42 lb/Imp gal), also where this involves a deviation from the standards.

Rating Guideline

IFN Power rating corresponds to ISO Overload Power. It is intended for applications where intermittent power is utilized less than 1 hour within any period of 12 hours of continuous operation. The average load factor must not exceed the continuous rating.

ICFN Power rating corresponds to ISO Standard Power for continuous operation. It is intended for constant load applications with uninterrupted service at full load for extended periods of time.

Derating

The engine may be operated up to 1000 m altitude and 40°C ambient air temperature without derating. For operation at higher altitudes and temperatures the power should be derated according to the following factors:

Altitude derating factor < 3000 m	4 % / 500 m
Altitude derating factor > 3000 m	6 % / 500 m
Ambient temperature derating factor	2 % / 5 °C
Humidity	No derating

VOLVO PENTA INBOARD DIESEL TAMD103A

6-cylinder, 4-stroke, direct-injected, turbocharged marine diesel engine
with aftercooler – crankshaft power* 199–287 kW (271–390 hp)

* Power rating – see Technical Data

Reliable and powerful

The TAMD103A is a powerful, reliable and economical marine diesel built on the dependable in-line six design.

Developed for Medium and Heavy duty operation for displacement, semi-planing and planing craft.

Durability and low noise levels

The Volvo Penta in-line six cylinder engine is a traditional well-balanced unit with powerfully dimensioned crankshaft bearings. This ensures smooth, vibration-free operation and low noise levels, which, together, provide the highest level of on-board comfort.

The torsionally rigid cylinder block and crank mechanism are designed to withstand many hours of demanding operation.

To maintain a stable working temperature in cylinders and combustion chambers, the engine is equipped with piston cooling and seawater-cooled oil cooler. The engine is also fitted with replaceable cylinder liners and valve seats/guides to ensure maximum durability and service life of the engine.

Low exhaust emission and fuel consumption

High-pressure injection through six-hole injection nozzles optimizes fuel-air mixture.

The improved combustion results in a very low fuel consumption, higher power and reduced noxious exhaust emissions. The engine complies with the IMO emission regulations.

Marine electrics

The two-pole electrical system is specifically adapted to demanding marine environments. Flex-mounted electrical box, with semi-automatic fuses and plug-in electrical connections.

Ease of service and maintenance

Easily accessible service and maintenance points contribute to the ease of service of the engine.

Comprehensive service network

Volvo Penta has a well-established network of authorized service dealers in more than 100 countries throughout the world. These service centers offer Genuine Volvo Penta Parts as well as skilled personnel to ensure the best possible service.

Technical description:

Engine and block

- Cylinder block and separate cylinder heads made of cast iron alloy
- Flywheel housing (aluminum) with connection acc. to SAE 1
- Replaceable cylinder liners and valve seats/guides
- Nitrocarburized crankshaft with seven main bearings
- Oil-cooled forged aluminum pistons
- Rigid camshaft with well designed cams. Large overlap between inlet and exhaust valves ensures excellent air flow, good cooling and low exhaust gas temperature.

Lubrication system

- Seawater-cooled oil cooler
- Gear pump pressurized lubricating system
- Twin full flow oil filters of spin-on type
- Oil sump with inspection covers
- Oil filler in valve cover
- Oil separating filter incl. overpressure valve for crankcase ventilation

Fuel system

- Fuel injection pump with centrifugal governor, smoke limiter and fuel feed pump
- Fuel shut-off valve 24V, electrically operated
- Six-hole injectors
- Twin fine fuel filters of spin-on type

Turbocharger

- Freshwater-cooled turbocharger

Cooling system

- Engine-mounted tubular heat exchanger with integrated expansion tank or bulkhead-mounted heat exchanger for reduced installation dimensions. Alternatively adapted for 2-circuit keel cooling.
- Seawater-cooled aftercooler
- Belt-driven freshwater pump and front-mounted seawater pump with neoprene impeller

Electrical system

- 24V electrical system, 24V/60A alternator
- Rubber suspended electrical terminal box with semi-automatic fuses and plug-in electrical connections

PENTA**

TAMD103A

Technical Data

Engine designation	TAMD103A
No. of cylinders and configuration	in-line 6
Method of operation	4-stroke, direct-injected, turbocharged diesel engine with aftercooler
Bore, mm (in.)	120.65 (4.75)
Stroke, mm (in.)	140 (5.5)
Displacement, l (in ³)	9.6 (585.8)
Compression ratio	17:1
Dry weight, kg (lb)	1190 (2623)
Dry weight with reverse gear MG5114SC, kg (lb)	1396 (3078)
Crankshaft power, Rating 2, kW (hp) 1800 rpm	287 (390)
Rating 1, kW (hp) 1800 rpm	255 (347)
Rating 1, kW (hp) 1800 rpm (repowering)	199 (271)
Torque, Rating 2, Nm (lbf.ft) 1800 rpm	1523 (1123)
Rating 1, Nm (lbf.ft) 1800 rpm	1353 (998)
Rating 1, Nm (lbf.ft) 1800 rpm (repowering)	1056 (779)
Recommended fuel to conform to	ASTM-D975 1-D & 2-D, EN 590 or JIS KK 2204
Specific fuel consumption, Rating 2, g/kWh (lb/hph)	212 (0.343)
Rating 1, g/kWh (lb/hph)	212 (0.343)
Rating 1, g/kWh (lb/hph) 1800 rpm (repowering)	215 (0.348)

Fuel temperature 40°C (104°F)

Technical data according to ISO 3046 Fuel Stop Power and ISO 8665. Fuel with a lower calorific value of 42700 kJ/kg and density of 840 g/liter at 15°C (60°F). Merchant fuel may differ from this specification which will influence engine power output and fuel consumption.

N.B. The product can also be used in an application with a higher rating than stated, e.g. R1 can be used for R2.

The engine complies with the IMO emission regulations.

Optional equipment:

Engine

- Flexible suspension for engine and reverse gear
- Cast iron flywheel housing

Lubrication system

- Deep oil sump with inspection covers
- Oil filling on starboard side
- Engine-mounted manual oil drain pump for shallow oil sump

Fuel system

- Single or twin fuel filter/water separator with shift valve

Exhaust system

- Exhaust elbow, dry or wet
- Silencer, dry
- Flexible compensator

Cooling system

- Seawater strainer
- Freshwater filter

Electrical system

- 24V/100A extra alternator
- Various instrument panels
- Cable harness in different lengths

Power transmission

- Auxiliary drive
- Extra pulley for crankshaft
- Hydraulic pump for steering and other duties

Reverse gear

- MG5114SC, MG5091DC (only R1 199 kW), ZF 311A

Other equipment

- 2" bilge/flush pump
- Belt guard
- White-painted engine and reverse gear

VOLVO PENTA INBOARD DIESEL TAMD165A

6-cylinder, 4-stroke, direct-injected, turbocharged marine diesel engine with aftercooler – crankshaft power* 404–441 kW (550–600 hp)

* Power rating – see Technical Data

Powerful and reliable engine for demanding operation in commercial applications

TAMD165A is the latest version of the proven 16-liter engine. A great number of items have been improved, resulting in entirely new levels of quality, power and low emissions. The engine is specially developed for displacement craft in Heavy Duty (Rating 1) and Medium Duty (Rating 2) operation and suitable for workboat applications thanks to high torque across a wide speed range.

TAMD165A has effective aftercooling and turbocharging including a new turbocharger with higher efficiency for more power. The engine fulfils extremely high demands on operational reliability and service life. The engine is also designed for long periods of low load idling.

Durability and low sound levels

The Volvo Penta in-line six cylinder engine is a well-balanced unit. The reinforced cylinder block, cylinder heads, pistons and piston rings, intake and exhaust valves give increased rigidity and stability. All improvements lead to minimized oil consumption and longer service life.

Twin vibration dampers reduce the crankshaft torsional tension and contribute to the vibrationfree operation and very low sound levels. New, freshwater-cooled, oil cooler and heat exchanger with high capacity to maintain low oil temperature, also with increased margin against contaminated water.

Low exhaust emission levels

Carefully balanced, new combustion and fuel systems for maximum power, minimum noxious emissions and low fuel consumption. This also results in good cold starting and load acceptance characteristics. The TAMD165A complies with the IMO and River Rhine emission regulations.

Marine electrics

New electrical system incorporating electromagnetic shut-off valve for immediate engine shutdown, for increased reliability. The electrical system is specially adapted to demanding marine environments with moisture-proof connectors and flex-mounted terminal box and senders.

TAMD165A with
MG516 reverse gear

Ease of service and maintenance

Large oil volumes and easily accessible service and maintenance points contribute to ease of service and low running costs.

Comprehensive service network

Volvo Penta has a well-established network of authorized service dealers in more than 100 countries throughout the world. These service centers offer Genuine Volvo Penta Parts as well as skilled personnel to ensure the best possible service.

Technical description:

Engine and block

- Reinforced cylinder block dimensioned for high output and low sound level. Cylinder block and the new improved cylinder heads of special alloy cast iron.
- Separate cylinder heads. Gasketless sealing design ensures high reliability against gas and coolant leakage.
- Replaceable cylinder liners and valve seats/guides. Four valves per cylinder and a centrally located injector provide effective combustion leading to lower fuel consumption.
- New improved aluminum pistons with uplifted piston rings of Keystone type. With effective piston cooling for minimum carbon deposits and increased piston and liner service life.
- Trapeze-shaped connecting rods with large bearings for lower tension.
- Tough, high located, seven bearing camshaft of special steel. Short stiff push rods,

strong valve springs resulting in a very stable and durable valve system. Roller cam followers for minimum friction and easy service.

- Seven-bearing nitrocarburized rigid crankshaft with generously dimensioned bearing surfaces for low bearing load.

Lubrication system

- Oil sump with inspection covers
- Twin oil filter of spin-on type, plus by-pass filter
- Freshwater-cooled oil cooler

Fuel system

- Fuel injection pump with centrifugal governor, smoke limiter and fuel feed pump
- Seven-hole injectors
- Fuel shut-off valve 24V, electrically operated
- Twin fine fuel filters of spin-on type

Turbocharger

- Freshwater-cooled turbocharger and exhaust manifold

Cooling system

- Seawater-cooled aftercooler
- Tubular heat exchanger or 2-circuit keel cooling
- Cooling pipes in copper/nickel give greater resistance to corrosion and longer service life
- Freshwater filter incl. corrosion protection
- Gear-driven freshwater pump

Electrical system

- 24V electrical system incl. 60A alternator with integrated charging sensor
- Rubber-suspended electrical terminal box

VOLVO PENTA INBOARD DIESEL TAMD165C

6-cylinder, 4-stroke, direct-injected, turbocharged marine diesel engine with aftercooler – crankshaft power* 375 kW (510 hp)

* Power rating – see Technical Data

Top technology for extreme demands

Dimensioned for high outputs. Built on the dependable in-line six with four valves per cylinder.

Designed for workboat operation in demanding environments and displacement workboats in Heavy Duty operation (Rating 1).

Particularly suitable for workboat applications due to high torque across a wide speed range.

Fulfills high demands on operational reliability and service life.

Built for effective turbocharging with well matched injection system, thus having good cold starting ability and load acceptance. The engine is also designed for long periods of low load idling.

Extremely well-balanced engine design combined with latest construction technique result in steady and vibrationfree running for highest possible degree of boat comfort.

Comprehensive, well developed modular system for factory-fitted equipment gives perfect matching to specific customer requirements, e.g. reverse gears, PTO's, cooling systems, electrical systems.

Easily adaptable to comply with the demands of the classification societies and marine authorities concerning operation in unmanned engine rooms.

The TAMD165C complies with the IMO and River Rhine emission regulations.

Large oil volume and easy to service construction for lowest service and maintenance costs.

Well-established service network in more than 100 countries using Genuine Volvo Penta Parts and skilled personnel minimizes non-operational time and costs.

VOLVO PENTA INBOARD DIESEL TAMD165P

6-cylinder, 4-stroke, direct-injected, turbocharged marine diesel engine with aftercooler – crankshaft power* 500–566 kW (680–770 hp)

* Power rating – see Technical Data

The ultimate power alternative

The TAMD165P is a high-performance engine with a very long service life, dimensioned for high power outputs and designed for high speed, planing craft. With its narrow installation dimensions the TAMD165P is ideal for twin engine installations.

The engine is turbocharged and aftercooled with a high power/fuel consumption ratio, thus offering excellent fuel economy. The improved turbocharger gives the engine superior torque characteristics resulting in excellent acceleration and load variation response.

Durability and low noise levels

The Volvo Penta in-line six cylinder engine is a well-balanced unit with powerfully dimensioned crankshaft bearings. In addition, twin harmonic stabilizers ensure smooth, vibration-free operation. This, together with very low noise levels, provide the highest onboard comfort.

The cylinder block is dimensioned for extremely high power outputs and matched power to weight characteristics.

To maintain a controlled working temperature in cylinders and combustion chambers, the engine is equipped with piston cooling and freshwater-cooled oil cooler. The engine is also fitted with replaceable cylinder liners and valve seats/guides to ensure maximum durability and service life of the engine.

Low exhaust emission levels

The state of the art, high-tech injection and charging system with low internal losses contributes to excellent combustion and low fuel consumption. The TAMD165P complies with the IMO and River Rhine emission regulations.

Marine electrics

The two-pole electrical system is specifically adapted to demanding marine environments with remote and flex-mounted senders as well as moisture-proof connectors.

TAMD165P with
ZF 350A reverse gear

Ease of service and maintenance

Easily accessible service and maintenance points contribute to the ease of service of the engine.

Comprehensive service network

Volvo Penta has a well-established network of authorized service dealers in more than 100 countries throughout the world. These service centers offer genuine Volvo Penta parts as well as skilled personnel to ensure the best possible service.

Technical description:

Engine and block

- Reinforced cylinder block dimensioned for high output and low sound level. Cylinder block and cylinder heads of special alloy cast iron.
- Flywheel housing with connection acc. to SAE 1
- Separate cylinder heads. Gasketless sealing design
- Replaceable cylinder liners and valve seats/guides
- Four valves per cylinder
- Double vibration dampers
- Seven-bearing nitrocarburized crankshaft for low bearing load
- Oil-cooled, forged aluminum pistons
- Piston rings of Keystone type
- Rigid camshaft with well designed cams. Short stiff push rods and strong valve

springs. Roller cam followers for minimum friction.

Lubrication system

- Shallow oil sump
- Freshwater-cooled oil cooler
- Gear pump pressurized lubricating system
- Twin oil filters of spin-on type plus bypass oil filter
- Twin oil separating filters incl. overpressure valve for crankcase ventilation

Fuel system

- Powerful injection pump with centrifugal governor and smoke limiter. Short fuel rack travel for most rapid fuel injection alteration.
- Fuel feed pump
- Centrally located injectors
- Seven-hole injectors
- Fuel shut-off valve 24V, electrically operated
- Twin fine fuel filters of spin-on type

Turbocharger

- Freshwater-cooled turbocharger and exhaust manifold

Cooling system

www.volvopenta.com

VOLVO PENTA INBOARD DIESEL TAMD31

4-cylinder, 4-stroke, direct-injected turbocharged marine diesel engine with aftercooler and reverse gear. Up to 110 kW (150 hp)*

* Crankshaft power according to ISO 8665

Reliable marine engine

TAMD31 is a reliable and economic marine engine with considerable power resources, developed for planing craft. With its compact dimensions, it is excellent for twin installation.

Direct injection

Direct injection (DI) results in a low thermal load and low fuel consumption compared with swirl chamber engines (IDI) with the same cylinder capacity.

Turbocharging

The engine is turbocharged with an exhaust-driven turbocompressor. More air can be forced into the cylinder in this way with the result that more fuel can be injected and the engine runs more efficiently. Since combustion takes place in a turbo engine with excess air, the exhaust gases are cleaner than in a naturally-aspirated engine.

The turbo also acts as an additional silencer both on the induction side and on the exhaust side.

Aftercooler

The air heats up and expands when it is compressed. In other words, it takes up more space. The aftercooler cools the compressed and heated air and raises its oxygen content so that the engine can use the fuel more efficiently.

Low exhaust emission levels

The direct injection, turbocharging and aftercooler contribute to minimizing noxious exhaust emissions and enhancing overall enjoyment of boating.

Reverse gear

Volvo Penta's hydraulically shifted reverse gear has been specially developed with a view to increasing the standard of comfort on board in terms of quiet running, greater reliability and enhanced efficiency.

These benefits originate from a hydraulic shifting mechanism and a gear

TAMD31 with reverse gear HS45A

technology that uses bevel gears throughout the gear train.

The combination of 8° down angle, large drop center and small dimensions provides for optimized installations.

A trolling valve kit is available to meet special demands, e.g. for sportfishing.

At Volvo Penta, focus is on developing the complete drive line ensuring perfectly matched engine/transmission packages for high torque, operational reliability, reduction of engine noise and vibrations.

Comprehensive service network

Volvo Penta has a well-established network of authorized service dealers in more than 100 countries throughout the world. These service centers offer Genuine Volvo Penta Parts as well as skilled personnel to ensure that you enjoy the best possible service.

Technical description:

Engine and block

- Cylinder block and cylinder head made of cast iron for good corrosion resistance and long service life
- Oil-cooled pistons with two compression rings and one oil scraper ring
- Replaceable wet cylinder liners
- Replaceable valve seats
- Five-bearing crankshaft

Engine mounting

- Elastic suspension consisting of 4 rubber pads with adjustable anchorage plates for dampening of sound and vibration

Lubrication system

- Pressure lubrication system with easily replaced full-flow oil filter on the side of the engine
- Tubular oil cooler that can be cleaned

Fuel system

- Rotor-type injection pump with a mechanical governor for accurate speed control
- Smoke limiter
- Fine filter with water separator
- Feed pump with hand primer
- Electrically-operated stopping device

**VOLVO
PENTA**

TAMD31

Air inlet and exhaust system

- Inlet system designed to produce optimal air rotation which provides perfect combustion. This results in high power and low fuel consumption.
- Air inlet silencer with replaceable filter
- Closed crankcase vent system
- Seawater-cooled exhaust elbow of cast iron with a stainless steel insert
- Exhaust-driven freshwater-cooled turbo-charger

Cooling system

- Thermostatically regulated freshwater cooling
- Tubular heat exchanger with separate transparent expansion tank
- Gear-driven seawater pump with rubber impeller
- Coolant system prepared for hot water outlet

Electrical system

- 12V corrosion-protected electrical system, complete with instrumentation
- 14V/60A marine alternator
- Charging regulator with battery sensor for voltage drop compensation
- The alternator is prepared for a bulkhead-mounted double-diode set which auto-

matically distributes the charge current to two separate battery circuits

- Automatic fuse with reset button
- Starter motor power 3.0 kW
- Extension cable harness with plug-in connection available in various lengths

Instrument panel:

Separate instruments and harness or complete panel fitted with:

- Key switch
- Temperature gauge
- Instrument lighting
- Alarm for temperature, oil pressure and charging
- Voltmeter
- Rev counter
- Hour meter
- Oil pressure gauge
- Alarm test

Reverse gear

- Bevel gears which results in smooth running at all speeds
- Hydraulically operated clutch for smooth shifting
- Matched drop center and 8° down angle for compact installation and minimum propeller shaft angle
- When under sail propeller shaft can rotate 24 hours without engine start
- Seawater-cooled oilcooler
- Trolling valve kit available

Accessories

An extensive range of accessories for:

- Fuel system
- Cooling system
- Control system
- Instruments
- Electric system
- Comfort & Safety
- Propellers
- Maintenance
- MED (SOLAS) kit available

For detailed information, please see Accessory catalogues.

Contact your local Volvo Penta dealer for further information.

VOLVO PENTA INBOARD DIESEL TAMD31S

**4-cylinder, 4-stroke, direct-injected turbocharged marine diesel engine
with aftercooler and reverse gear. 74 kW (100 hp)***

* Crankshaft power according to ISO 8665

Reliable marine engine

TAMD31S is a reliable and economic marine engine with considerable power resources, developed for displacement craft, such as motorboats and sailing yachts.

Direct injection

Direct injection (DI) results in a low thermal load and low fuel consumption compared with swirl chamber engines (IDI) with the same cylinder capacity.

Turbocharging

The engine is turbocharged with an exhaust-driven turbocompressor. More air can be forced into the cylinder in this way with the result that more fuel can be injected and the engine runs more efficiently. Since combustion takes place in a turbo engine with excess air, the exhaust gases are cleaner than in a naturally-aspirated engine.

The newly-designed turbo is controlled by a wastegate valve and gives a considerably higher torque at low engine speed.

The turbo also acts as an additional silencer both on the induction side and on the exhaust side.

Aftercooler

The air heats up and expands when it is compressed. In other words, it takes up more space. The aftercooler cools the compressed and heated air and raises its oxygen content so that the engine can use the fuel more efficiently.

Low exhaust emission levels

The direct injection, turbocharging and aftercooler contribute to minimizing noxious exhaust emissions and enhancing overall enjoyment of boating. The TAMD31S is certified according to BSO II and SAV.

Reverse gear

Volvo Penta's mechanically and hydraulically shifted reverse gears have been specially developed with a view to increasing the standard of comfort on board in terms

TAMD31S with
reverse gear HS25A

of quiet running, greater reliability and enhanced efficiency.

The combination of 8° down angle, large drop center and small dimensions provides for optimized installations.

A trolling valve kit is available to meet special demands, e.g. for sportfishing.

At Volvo Penta, focus is on developing the complete drive line ensuring perfectly matched engine/transmission packages for high torque, operational reliability, reduction of engine noise and vibrations.

Comprehensive service network

Volvo Penta has a well-established network of authorized service dealers in more than 100 countries throughout the world. These service centers offer Genuine Volvo Penta Parts as well as skilled personnel to ensure that you enjoy the best possible service.

Technical description:

Engine and block

- Cylinder block and cylinder head made of cast iron for good corrosion resistance and long service life
- Oil-cooled pistons with two compression rings and one oil scraper ring
- Replaceable wet cylinder liners
- Replaceable valve seats
- Five-bearing crankshaft

Engine mounting

- Elastic suspension consisting of 4 rubber pads with adjustable anchorage plates for dampening of sound and vibration

Lubrication system

- Pressure lubrication system with easily replaced full-flow oil filter on the side of the engine
- Tubular oil cooler that can be cleaned

Fuel system

- Rotor-type injection pump with a mechanical governor for accurate speed control
- Smoke limiter
- Fine filter with water separator
- Feed pump with hand primer
- Electrically-operated stopping device

VOLVO PENTA

TAMD31S

Inlet and exhaust system

- Inlet system designed to produce optimal air rotation, which provides perfect combustion. This results in high power and low fuel consumption.
- Inlet silencer with replaceable filter
- Closed crankcase vent system
- Seawater-cooled exhaust elbow of cast iron with a stainless steel insert
- Exhaust-driven freshwater-cooled turbo-charger

Cooling system

- Thermostatically regulated freshwater cooling
- Tubular heat exchanger with separate transparent expansion tank
- Gear-driven seawater pump with rubber impeller
- Coolant system prepared for hot water outlet

Electrical system

- 12V corrosion-protected electrical system, complete with instrumentation
- 14V/60A marine alternator
- Charging regulator with battery sensor for voltage drop compensation
- The alternator is prepared for a bulkhead-mounted double-diode set which auto-

matically distributes the charge current to two separate battery circuits

- Automatic fuse with reset button
- Starter motor power 3.0 kW
- Extension cable harness with plug-in connection available in various lengths

Instrument panel:

Separate instruments and harness or complete panel fitted with:

- Key switch
- Temperature gauge
- Instrument lighting
- Alarm for temperature, oil pressure and charging
- Voltmeter
- Rev counter
- Hour meter
- Oil pressure gauge
- Alarm test

Reverse gear

HS25A Hydraulic – drop center with 8° down angled output shaft. Trolling valve kit available.

- Ratio 2.29:1/2.29:1 (RH/LH) and 2.71:1/2.71:1 (RH/LH).

MS25A Mechanical – drop center with 8° down angled output shaft.

- Ratio 2.23:1/2.74:1 (RH/LH).

MS25L Mechanical – drop center with straight output shaft.

- Ratio 2.27:1/2.10:1 (RH/LH).

Accessories

An extensive range of accessories for:

- Fuel system
- Cooling system
- Control system
- Instruments
- Electric system
- Comfort & Safety
- Propellers
- Maintenance

For detailed information, please see Accessory catalogues.

VOLVO PENTA INBOARD DIESEL TAMD41

6-cylinder, 4-stroke, direct-injected turbocharged marine diesel engine with aftercooler and reverse gear. Up to 147 kW (200 hp)*

* Crankshaft power according to ISO 8665

Reliable marine engine

TAMD41 is a reliable and economic marine engine with considerable power resources, developed for planing craft. With its compact dimensions, it is excellent for twin installation.

Direct injection

Direct injection (DI) results in a low thermal load and low fuel consumption compared with swirl chamber engines (IDI) with the same cylinder capacity.

Turbocharging

The engine is turbocharged with an exhaust-driven turbocompressor. More air can be forced into the cylinder in this way with the result that more fuel can be injected and the engine runs more efficiently. Since combustion takes place in a turbo engine with excess air, the exhaust gases are cleaner than in a naturally-aspirated engine.

The turbo also acts as an additional silencer both on the induction side and on the exhaust side.

Aftercooler

The air heats up and expands when it is compressed. In other words, it takes up more space. The aftercooler cools the compressed and heated air and raises its oxygen content so that the engine can use the fuel more efficiently.

Low exhaust emission levels

The direct injection, turbocharging and aftercooler contribute to minimizing noxious exhaust emissions and enhancing overall enjoyment of boating. Engines above 130 kW comply with the IMO emission regulations.

Reverse gear

Volvo Penta's hydraulically shifted reverse gear has been specially developed with a view to increasing the standard of comfort on board in terms of quiet running, greater reliability and enhanced efficiency.

TAMD41 with
HS63A reverse gear

These benefits originate from a hydraulic shifting mechanism and a gear technology that uses bevel gears throughout the gear train.

The combination of 8° down angle, large drop center and small dimensions provides for optimized installations.

A trolling valve kit is available to meet special demands, e.g. for sportfishing.

At Volvo Penta, focus is on developing the complete drive line ensuring perfectly matched engine/transmission packages for high torque, operational reliability, reduction of engine noise and vibrations.

Comprehensive service network

Volvo Penta has a well-established network of authorized service dealers in more than 100 countries throughout the world. These service centers offer Genuine Volvo Penta Parts as well as skilled personnel to ensure that you enjoy the best possible service.

VOLVO PENTA INBOARD DIESEL TAMD63L/P

6-cylinder, 4-stroke, direct-injected, turbocharged marine diesel engine
with aftercooler – crankshaft power* 173–272 kW (235–370 hp)

* Power rating – see Technical Data

Compact performance

The TAMD63 is a powerful, reliable and economical marine diesel engine, specially developed for fast planing and semi-planing craft. The installation volume is approx. 30% less than that of the preceding engines.

The engine has been specifically constructed for efficient turbocharging with a high power/fuel consumption ratio. Thus offering excellent fuel economy.

Durability and low noise levels

The Volvo Penta in-line six is a well-balanced unit with smooth and vibration-free operation and low noise levels. The torsionally-rigid cylinder block and crank mechanism are designed to withstand many hours of demanding operation.

To maintain a stable working temperature in cylinders and combustion chambers, the engine is equipped with piston cooling and freshwater-cooled oil cooler.

The engine is also fitted with replaceable cylinder liners and valve seats/guides to ensure maximum durability and service life.

Low exhaust emission levels

A low-air rotation combustion technique, producing optimum airflow, and a high-pressure injection system with 5-hole injectors ensure an optimum fuel-air mixture. This greatly contributes to reduced noxious exhaust emission levels. The direct injection (DI) system ensures a low fuel consumption. The engine complies with the IMO emission regulations.

Marine electrics

The two-pole electrical system is specially adapted to demanding marine environments with remote and flex-mounted senders as well as moisture-proof connectors.

Ease of service and maintenance

The single poly-V drive belt driving the alternator and freshwater circulation pump (a single service point at the front of the

TAMD63L/P with
ZF 220A reverse gear

engine) together with the oil filter and the by-pass filter contribute to ease of service and maintenance.

Comprehensive service network

Volvo Penta has a well-established network of authorized service dealers in more than 100 countries throughout the world. These service centers offer Genuine Volvo Penta Parts as well as skilled personnel to ensure that you enjoy the best possible service.

Technical description:

Engine and block

- Cylinder block and cylinder heads made of cast iron alloy
- Two cylinder heads. A flame barrier protects the cylinder head gasket.
- Replaceable wet cylinder liners and valve seats/guides
- Nitrocarburized crankshaft with seven main bearings
- Oil-cooled forged aluminum pistons
- Three piston rings, the upper of which is of the keystone type

Lubrication system

- Freshwater-cooled oil cooler
- Oil filter and by-pass filter of spin-on type
- Oil dipsticks on both sides of oil sump

Fuel system

- Fuel injection pump with centrifugal governor, smoke limiter and fuel feed pump
- Five-hole injectors
- Twin fine fuel filters of spin-on type
- Electrical fuel valve stopping device

Turbocharger

- Freshwater-cooled turbocharger
- Wastegate for high torque at low speed (TAMD63P)

Cooling system

- Tubular heat exchanger with integrated expansion tank or 2-circuit keel cooling
- Seawater-cooled tubular aftercooler
- Poly-V driven freshwater pump and gear-driven seawater pump with neoprene impeller

Electrical system

- 12 V or 24 V electrical system incl. alternator, 60 and 40 A respectively, with charging sensor
- Rubber suspended electrical terminal box with semi-automatic fuses

VOLVO PENTA INBOARD DIESEL TAMD74A

6-cylinder, 4-stroke, direct-injected, turbocharged marine diesel engine
with aftercooler – crankshaft power* 154–257 kW (209–350 hp)

* Power rating – see Technical Data

Reliable and powerful

The TAMD74A is a powerful, reliable and economical marine diesel built on the dependable in-line six design.

Developed for Medium and Heavy duty operation for displacement, semi-planing and planing craft.

Durability and low noise levels

Designed for easiest, fastest and most economical installation.

Well-balanced to produce smooth and vibration-free operation with low noise level.

Comprehensive program of factory-fitted equipment for perfect matching to specific customer requirements, e.g. reverse gears, PTO's, cooling systems, electrical systems.

To maintain a controlled working temperature in cylinders and combustion chambers, the engine is equipped with piston cooling and freshwater-cooled oil cooler. The engine is also fitted with replaceable cylinder liners and valve seats/guides to ensure maximum durability and service life of the engine.

Low exhaust emission levels

The state of the art, high-tech injection and charging system with low internal losses contributes to excellent combustion and low fuel consumption. The TAMD74A complies with the IMO emission regulations.

Marine electrics

The classifiable two-pole electrical system "CU 2500F" is specifically adapted to demanding marine environments with remote and flex-mounted senders as well as moisture-proof connectors.

TAMD74A
with MG5091DC

Ease of service and maintenance

Easily accessible service and maintenance points contribute to the ease of service of the engine.

6-cylinder, 4-stroke, direct-injected, turbocharged marine diesel engine
with aftercooler – crankshaft power* 294–331 kW (400–450 hp)

* Power rating – see Technical Data

Powerful performance for commercial applications

The TAMD74C EDC marine diesel is specially developed for fast planing and semi-planing craft. The engine's high output combined with a rich torque curve ensures excellent performance, acceleration and response, suitable for propeller and waterjet applications. Its compact dimensions optimizes boat layout, minimizes impact on living space onboard and improves service accessibility.

EDC – optimizing engine performance

EDC (Electronic Diesel Control) – an electronically controlled processing system that determines the precise quantity of fuel required at any given moment. The EDC system takes full account of variation in operating temperature, air pressure and other contributing factors, which optimizes engine performance and efficiency, reducing fuel consumption and emissions.

Enhanced onboard comfort

The Volvo Penta in-line six cylinder engine is an uncomplicated design with a minimum of moving parts, specially developed for highly demanding marine applications. The engine is a well-balanced unit with powerfully dimensioned crankshaft bearings. This ensures smooth, vibration-free operation and low noise levels.

The EDC system improves engine response with lower and more stable idling.

The electrical control levers are operated more smoothly and precisely, requiring much less force.

Automatic twin engine synchronization reduces noise and vibration levels, increasing service life of engine.

High-pressure injection in combination with six-hole nozzles and the EDC system optimizes fuel-air mixture. This greatly contributes to more efficient combustion with higher power and reduced noxious exhaust emissions. The engine complies with the IMO emission regulations.

TAMD74C EDC
with MG5075A-E

Easy installation and maintenance

Plug-in electrical connectors, compact dimensions and the EDC system ensures an easy, simple and time-saving installation. The EDC system's self-diagnostic facility and easily accessible service and maintenance points contributes to the ease of service of the engine.

Worldwide service support in more than 100 countries

The Volvo Penta Parts and service dealer network is a truly international operation with authorized service dealers around the world. These service centers offer Genuine Volvo Penta Parts as well as skilled personnel to ensure the best possible service. Continuous product and service training ensures that our products are well supported.

Technical description:

Engine and block

- Cylinder block and cylinder heads made of cast iron alloy
- Two cylinder heads
- Replaceable wet cylinder liners and valve seats/guides

- Nitrocarburized crankshaft with seven main bearings
- Oil-cooled forged aluminum pistons
- Three piston rings, upper of keystone type

Lubrication system

- Freshwater-cooled oil cooler
- Side-mounted full-flow and by-pass filter of spin-on type
- Oil dipsticks on both sides of oil sump

Fuel system

- Fuel injection pump incl. fuel feed pump and electronically controlled actuator
- Electronically controlled central processing system (EDC – Electronic Diesel Control) with integrated stop function
- Compensation to allow max output at fuel temperatures of 5–55°C (41–131°F)
- Six-hole injectors
- Twin fine fuel filters of spin-on type

Turbocharger

- Freshwater-cooled turbocharger with wastegate

Cooling system

- Tubular heat exchanger with integrated expansion tank or 2-circuit keel cooling
- Seawater-cooled tubular aftercooler
- Gear-driven seawater pump

Electrical system

- 12 V or 24 V electrical system incl. alternator (60A) with charging sensor
- Rubber suspended electrical terminal box with semi-automatic fuses

 Method of operation 4-stroke,
 direct-injected, turbocharged
 diesel engine with aftercooler

Bore, mm (in.) 107 (4.21)
 Stroke, mm (in.) 135 (5.31)
 Displacement, l (in³) 7.28 (444)
 Compression ratio 17.2:1
 Dry weight, kg (lb) 860 (1896)
 Weight with reverse gear MG5075A-E,
 excl. water and oil, kg (lb) 1045 (2304)
 Crankshaft power,
 Rating 4, kW (hp) 2600 rpm 331 (450)
 Rating 3, kW (hp) 2500 rpm 316 (430)
 Rating 3 is also available for 294 kW (400 hp).
 Propshaft power with MG5075A-E,
 Rating 4, kW (hp) 2600 rpm 318 (432)
 Rating 3, kW (hp) 2500 rpm 303 (412)
 Torque,
 Rating 4, Nm (lbf.ft) 2600 rpm 1214 (895)
 Rating 3, Nm (lbf.ft) 2500 rpm 1202 (887)
 Recommended fuel to
 conform to ASTM-D975 1-D & 2-D,
 EN 590 or JIS KK 2204

Specific fuel consumption,
 R4, g/kWh (lb/hph) 2600 rpm 235 (0.382)
 R3, g/kWh (lb/hph) 2500 rpm 229 (0.372)

Technical data according to ISO 3046 Fuel Stop Power and ISO 8665. Fuel with lower calorific value of 42,700 kJ/kg and density of 840 g/liter at 15°C (60°F). Merchant fuel may differ from this specification which will influence engine power output and fuel consumption.

Fuel temperature 5–55°C (41–131°F).

N.B. The product can also be used in an application with a higher rating than stated, e.g. R3 can be used for R4 or R5.
 The engine complies with the IMO emission regulations.

Optional equipment:

Engine

- Flexible suspension for engine and reverse gear

Lubrication system

- Electrically operated oil drain pump

- Rear-mounted full-flow and bypass oil filters of spin-on types

Fuel system

- Single or twin fuel filters/water separators

Exhaust system

- Exhaust elbow, wet
- Exhaust riser, wet
- Exhaust boot, wet
- Exhaust elbow, dry
- Silencer, dry
- Flexible compensator, dry

Cooling system

- Seawater strainer
- Hot water outlet
- Separate expansion tank

Electrical system

- 12V 130A or 24V 100A extra alternators
- Various instrument panels
- Cable harness in different lengths
- EDC Monitoring panels
- Multistation unit
- Electrical control lever

Power transmission

- PTO crankshaft front end, type stub shaft incl. universal bracket
- Hydraulic pump for steering and other duties

Reverse gear

- MG5075A-E, MG5085A-E, MG5085SC-E, ZF 280A-EB, ZF 301A-EB, and ZF 302IV-EB, electrically shifted

Other equipment

- Belt guard
- White-painted engine and reverse gear

VOLVO PENTA INDUSTRIAL DIESEL

TD520VE

Engine for industrial applications
76kW (102 hp)

The TD520VE is a powerful, reliable and economical Versatile Diesel Engine.

Durability & reliability

Designed for easiest, fastest and most economical installation. Well-balanced to produce smooth and vibration-free operation with low noise level.

To maintain a controlled working temperature in cylinders and combustion chambers, the engine is equipped with piston cooling.

Operational economy

The state of the art, high-tech injection and charging system with low internal losses contributes to excellent combustion and low fuel consumption.

The TD520VE complies with present emission regulations in both USA and Europe

Easy service & maintenance

Modern injection system, integrated oil cooler and all service points located on one side provides best possible access in an installation. Replaceable cylinder liners valve guides and valve seats gives lower service and repair costs for the customer. Quality Volvo Penta support is available in more than 100 countries all over the world. No matter where the equipment ends up, the end user will have a local Volvo Penta support.

Technical description:

Engine and block

- Optimized cast iron cylinder block with optimum distribution of forces
- Piston cooling for low piston temperature and reduced ring temperature
- Drop forged steel connecting rods for reduce risk of piston cracking
- Crankshaft hardened bearing surfaces and fillets for moderate load on main and high-end bearings
- Keystone top compression rings for long service life
- Replaceable valve guides and valve seats
- PTO positions at flywheel end
- Lift eyelets
- Flywheel housing with connection acc to SAE 2
- Flywheel for flexible coupling and friction clutch

Features

- Power Pac configuration
- Built in reliability and durability features
- High power to weight ratio
- Emission compliant
- Noise optimized engine design
- A selection of optional equipment

Lubrication system

- Full flow disposable spin-on oil filter, for extra high filtration
- Rotary displ oil pump driven by the crankshaft
- Deep centre oil sump
- Oil filler on valve cover
- Oil dipstick, right side, front
- Integrated full flow oil cooler, side-mounted

Fuel system

- Six hole fuel injection nozzles
- Direct injection unit pump with smoke limiter function
- Heavy duty fuel prefilter with water separator
- Belt driven rotary low-pressure fuel pump
- Fine fuel filter of disposable type
- Fuel shut-off solenoid, electrically operated, 12 V

Intake and exhaust system

- Turbo charger
- Closed crankcase ventilation
- Cooling system
- Belt driven, maintenance-free coolant pump with high degree of efficiency
- Efficient cooling with accurate coolant control through a water distribution duct in the cylinder block. Reliable sleeve thermostat with minimum pressure drop
- Cooling water pipe, inlet and outlet
- Fan hub
- Puller fan, 520 mm

Electrical system

- 12V electrical system incl. sensors
- Alternator 14V / 55A
- Starter motor, Bosch, 4.0 kW/24 V, single pole

VOLVO PENTA

TD520VE

Power Pac equipment

Lubrication system

- Oil drain pump

Fuel system

- Heavy duty fuel prefilter
- Fuel hand pump

Intake and exhaust system

- Air filter
- Silencer

Cooling system

- Tropical radiator
- Radiator guard
- Expansion tank

Control system

- Speed control

Electrical system

- Cable harness
- Instrument panel, 12V

Miscellaneous

- Base frame

Optional equipment

Engine

- Additional cranshaft pulleys
- Friction clutch

Lubrication system

- Oil filling on crank case

Fuel system

- Fuel temperature switch

Electrical system

- Alarm sparator / Fault indication

Miscellaneous

- Coolant preheater
- Tool kit

Technical Data

Engine designation	TD520VE
IFN net power at 1800rpm with fan, kW (hp)	76 (102)
Max Torque, Nm (lbf ft)	424 (313)
Displacement, l (in ³)	4.76 (290)
Number of cylinders	4
Bore/stroke, mm (in.)	108/130 (4.25/5.12)
Compression ratio	18.4:1
Dry weight, kg (lb)	725 (1598)

The engine performance corresponds to ISO 3046, BS 5514 and DIN 6271. The technical data applies to an engine without cooling fan and operating on a fuel with calorific value of 42.7 MJ/kg (18360 BTU/lb) and a density of 0.84 kg/litre (7.01 lb/US gal, 8.42 lb/Imp gal), also where this involves a deviation from the standards.

Dimension TD520VE

Not for installation

Note! The engine illustrated may not be entirely identical to production standard engines

Power Standards

The engine performance corresponds to ISO 3046, BS 5514 and DIN 6271. The technical data applies to an engine without cooling fan and operating on a fuel with calorific value of 42.7 MJ/kg (18360 BTU/lb) and a density of 0.84 kg/litre (7.01 lb/US gal, 8.42 lb/Imp gal), also where this involves a deviation from the standards.

Rating Guideline

IFN Power rating corresponds to ISO Overload Power. It is intended for applications where intermittent power is utilized less than 1 hour within any period of 12 hours of continuous operation. The average load factor must not exceed the continuous rating.

ICFN Power rating corresponds to ISO Standard Power for continuous operation. It is intended for constant load applications with uninterrupted service at full load for extended periods of time.

Derating

The engine may be operated up to 1000 m altitude and 40°C ambient air temperature without derating. For operation at higher altitudes and temperatures the power should be derated according to the following factors:

Altitude derating factor < 3000 m	4 % / 500 m
Altitude derating factor > 3000 m	6 % / 500 m
Ambient temperature derating factor	2 % / 5 °C
Humidity	No derating

Power Standards

The engine performance corresponds to ISO 3046, BS 5514 and DIN 6271. The technical data applies to an engine without cooling fan and operating on a fuel with calorific value of 42.7 MJ/kg (18360 BTU/lb) and a density of 0.84 kg/litre (7.01 lb/US gal, 8.42 lb/imp gal), also where this involves a deviation from the standards.

Rating Guidelines

IFN Power rating corresponds to ISO Overload Power. It is intended for applications where intermittent power is utilized less than 1 hour within any period of 12 hours of continuous operation. The average load factor must not exceed the continuous rating.

ICXN Power rating corresponds to ISO Standard Power for continuous operation with 10% overload available. It is intended for constant load applications with uninterrupted service for extended periods of time. The ICXN power can be exceeded by 10% 1 hour within any period of 12 hours of continuous operation. The average load factor must not exceed the continuous rating.

VOLVO PENTA AQUAMATIC

3.0GS/SX

4-cylinder, 4-stroke, gasoline marine engine
100 kW (135 hp)

Engine

Compact and reliable in-line 4-cylinder seawater-cooled gasoline engine with cast iron cylinder block, head and exhaust manifold, specially developed for marine environment. With a 3.0 liter displacement and high torque, the engine is ideal for single and twin applications.

Virtually maintenance-free breakerless ignition system. Easily accessible seawater pump located in the front of the engine. The 3.0GS engines are equipped with hydraulic valve lifters, which eliminate the need of valve adjustment. The crankshaft is supported with five main bearings for extra strength and smooth running.

Aquamatic sterndrive

The SX single propeller drive is of the most modern design featuring exhaust through the propeller hub for quiet and efficient operation, a cone clutch for easy and smooth shifting, pattern-matched spiral bevel gears for optimum strength and minimum gear whine, and a break-away shaft coupling to prevent costly drivetrain repairs.

The hydrodynamic design of the lower drive housing ensures excellent course stability both at high speed and when maneuvering at low speeds and in reverse. The drive is equipped with easily maneuvered hydraulic power trim for obtaining the best running position at different sea and load conditions.

For maximum corrosion protection the drive has gone through a 23 step paint process and comes equipped with sacrificial anodes

3.0GS with Aquamatic SX drive

both on the drive and transom shield.

Either right- (standard) or left-handed propellers can be used. A choice of stainless steel and aluminum propellers are available for different applications.

Electrical system

The electrical system features a 12 V corrosion-protected marine electrical system which meets the U.S. Coast Guard requirements. The engine is wired for easy plug-in connection to the instrument panel. The engine electrical system and the electric hydraulic power trim is protected by a 50 A circuit breaker and comes equipped with a 65 A alternator. Full instrumentation including trim gauge and wiring harness (option on certain markets).

Technical description:

Engine and block

- Cylinder block and cylinder head made of cast iron for good corrosion resistance
- Pistons with two compression rings and one oil scraper ring
- Five-bearing crankshaft
- Valve train consisting of single camshaft, hydraulic valve lifters, push rods and two overhead valves per cylinder

Engine mounting

- Two adjustable rubber mounts, one on each side of the engine, and two between transom shield assembly and engine

Lubrication system

- Pressure lubrication system with full-flow oil filter of spin-on type

Fuel system

- Two-barrel carburetor with automatic choke
- Fuel feed pump with integrated fuel filter
- Stainless steel fuel lines

VOLVO
PENTA

3.0GS/SX

Inlet and exhaust system

- Marine intake manifold
- Flame arrestor
- Closed crankcase ventilation
- Seawater-cooled exhaust manifold and riser made of cast iron
- Complete exhaust line with pipe and bel-
lows for exhaust outlet through the drive

Cooling system

- Thermostatically controlled seawater cooling
- Crankmounted seawater pump
- Electrocoated exhaust riser
- Flush fitting – hose connection to flush cooling system with freshwater

Electrical system

- 12 V corrosion-protected electrical system
- 65 A alternator with internal transistorized voltage regulator
- Charging regulator with battery sensor for voltage drop compensation
- Breakerless electronic ignition system
- One 50 A resettable circuit breaker for the trim system
- Starter motor power 1.0 kW
- Audio alarms – engine oil pressure and temperature as well as exhaust overheat

Instruments

(option on certain markets)

- Complete instrument panel including:
Rev counter, engine temperature gauge, oil pressure gauge, voltmeter, key switch, two fuses, instrument light switch
- Wiring harness from engine to instrument panel
- Maneuver switch for power trim
- Wiring harness from trim pump to maneuver switch for power trim

Drive

- Single propeller drive which can be run with both right- and left-hand propellers
- Cone clutch
- Coolant water intake for the engine located at the lower part of the drive
- Pattern-matched spiral bevel gears
- Through-hub exhaust
- Overload protection sleeve (break-away coupling)
- The drive can be tilted 55°
- The drive can be turned 28° in each direction
- Built-in kick-up function to reduce possible damage, in the event the drive strikes an underwater object
- Belt-driven power steering pump (option)
- Active corrosion protection as accessory

Power Trim

- Electrically operated hydraulic system with trim gauge for best driving comfort

Accessories

An extensive range of accessories for:

- Fuel system
- Cooling system
- Control system
- Steering system
- Instruments
- Electric system
- Comfort & Safety
- Propeller & Drive
- Maintenance
